## Connected with the Future

The USB 3.0 port of this external enclosure for 2.5" SATA HDDs makes superfast data transfer possible. That's because USB 3.0 has a tenfold bandwidth compared to USB 2.0 and even a good advantage against SATA. The ICY BOX IB-250StU3+BH15 accomplishes the superfast data-transfer rates in connection with a host and a cable which are USB 3.0 compatible too. If the host PC is not equipped with a USB 3.0 controller our adapters for the PCI slot or the express-card slot are fine alternatives (ICY BOX IB-AC604 or IB-AC605). As USB 3.0 is downwards compatible the ICY BOX IB-250StU3+BH15 cooperates also with conventional USB 2.0 devices providing the USB 2.0 bandwidth. Thus this ICY BOX can be the first stepping stone into the faster USB 3.0 future.
